

ScriptVessel Manual

(V2.06)

***** **CAUTION** *****

- 1# Using ScriptVessel may give your character a free trip to Bot Jail by GMs or new update.
- 2# Using ScriptVessel may lost your items, If you get pked or other reasons.
- 3# We add some protect to check the SV files, any modification on the files (scriptvessel.exe or countrymakeinUS.dll) is not accepted. If you modify the files, we will take it as CRACK CLIENT.

Start the program:

1. Start the game and login your character.
2. Start the platform(ScriptVessel.exe)
3. Fill in the Account and Password (SV account) we provide then press **[START]** button.
4. Active the game window, move the character and press **F11** or **Ctrl+*** to start the setting interface.
5. Setting the feature and start Macro.

Note:

If you use windows vista, Pls Right-Click the program and click "Run as administrator."

If you use the full version and slow down when botting, Pls stop it and Email us the problem.

Record Route:

1. After pressing the "START" button to start Macro, the Scriptvessel interface will hide and SV will begin to perform it tasks.
2. If the character moves, press F5 to start route recording, walk through the route that you want the Macro to move on for once, then press F5 again to complete the recording.

Setting Manual

ONE# Error Message

1. If you get the message "**the Account is using now**", you dont close the ScriptVessel.exe normally. Pls wait 20 minitues and login again.
2. If you get the message "**server offline no response or version update**", the internet or server have some problem. Pls login again or login later.

TWO# "F"-Keys Reminder

- F1 HP pots
- F2 MP pots/Arrows
- F3 HP boxes
- F4 MP boxes
- F8 Sit
- F9 Meditation/Cure
- F10 XP skill

THREE# Interface Setting

There are 8 functions for setting on the interface:

1. Level Up
2. PLvL(PK) - **the function is not completed, be careful to use it**
3. Off Screen mining
4. Prompt the person or monster
5. Follow Team Leader
6. Level up manually and Prompt refined weapon
7. Timed Clicking
8. Automatic Gambling

1# Level Up / PLvL(PK) Setting

(1) Function = Enable Level Up or Enable PLvL(PK)

(2) Characters = Choose your class (job) of character

(3) Attack Key = Choose weather you want your character to right or left click

Click every(In seconds): Default is 1 second, But some slow skill such as Taoist's Fire Circle must modify the setting.

(4) Movement = Choose weather you want your character to Jump or Run

We have developed the program to avoid dropping items when jumping. It is safe to Choose JUMP for leveling up. If you Choose JUMP, Pls use RECORD ROUT feature for Leveling up.

(5) No KS / KS = Choose weather you want your character to Kill Steal (KS) or not

If you choose no KS you character will run away if it sees monsters that you have not set to attack and or players, also if your reborn and have your guard out and have it to No KS, your character will run from your guard

(6) Monster-name = This is where you input what monsters/people you want to attack

If it don't attack monsters, Pls active SHOW NAME in game first.

Scan names = If there are monsters/players in your area, this button will add them to your Monster-name area

(7) Attack Point = Choose to attack normal monsters or flying monsters.

Adjust Attack-Point higher: If you find your character is very near by monster which you are attacking, you can adjust from 10 to 100 in it.

(8) Pick Up Items

If your items in inventory are more than 34, the program picks up Mets/db's only. If they are more than 38, the program only picks up db's. If you want to pick up other items, Pls ensure your items are less than 35.

-Choose **DEFAULT** to pickup gold/mets/db's/supers/elietes/unique.

-Choose **NONE** to ignore all items including the item's name in "A".

-Choose **ALL** to pick up all items and drop the useless items immediately.

"A->" Reminder:

Here is where you can add specific items for your character to pickup, replace 'None' with the item you want it to pick up

"B->" Reminder:

Here you may enter a number from 5, 9 or 59 for certain types of items not to pick up, these are the numbers and what there for:

5 = Do not pickup Refined/unique items

9 = Do not pickup CERTAIN GLOD

59 = Do not pickup Refined/unique items and CERTAIN GLOD

"C->" Reminder:

Here is where you can add specific items for your character not to pickup, replace 'None' with the item you don't want to pick up

Note:

1# If Choose **DEFAULT** and input 5,9 or 59 in B, You will pick up Default items but the types you set in B.

2# If Choose **All** and input 5,9 or 59 in B, You will pick up all items and drop the useless items and the types you set in B immediately.

3# There are some bugs that it will drop HP or MP boxes sometimes. You can fill in the HP or MP box's name in field A. And it will never drop it again.

(9) Use Pots at = Place HP Pots on F1 and manna pots on F2 and here you can set when your character will use HP or Manna pots judged on how much HP/MP you have left

(10) Logout On = Here you can set if you want your character to exit game after its HP Drops down to a certain point

(11) Durability = Choose at what durability your equipment can get to before your character will exit game

(12) Press F2 every = Choose how often (In seconds) SV presses F2

(13) Record Route = after you have set up your Macro, choose this option and click start, now press F5 and start moving around as where you want your Macro to go. When that is done press F5 again to finish recording.

(14) Record Route

-Choose **DEFAULT**, the character will walk around the area according to the area15.

-Choose **RECORD ROUTE**, you must record route(F5) that you want the character to walk after the Macro is started. And the setting of area15 is invalid.

(15) Area = Choose Area (Basically the radius from your current coordinates) and Mov (the amount of steps your character will take around the area you have set)

If the character is Taoist and want to Autostig, Pls set Area=1 and Mov=0

(16) Disconnect on names = Input players names here when you want to disconnect on certain players/monsters (**Please add a comma "," after every name**)

-Choose **Login again**, the character will disconnect and go to the login windows. And if you set as **AUTO RECONNECT**, you will reconnect again after the rand reconnect time you setting.

-Choose **Logout game**, the character will exit the game directly and never login again.

-Check **All Players**, the character will disconnect on all players but the names in **But**. (**Please add a comma "," after every name also**)

-Check **Red/Black Name(only when it flashes)**, the character will disconnect on meeting Red/Black Name which is flashing(is attacking monsters/players).

-If it include "[GM], " in the field, you will DC on GMs which name including a [GM] or [PM].

(17) Auto Reconnect =It will reconnect if you disconnect by the server or congested internet. It will also reconnect again if you choose **Login again** in (16).

(18) Rand Reconnect=If you set as **AUTO RECONNECT**, Pls set number **X** to **Y** minutes to connect again. So you can reconnect a random time from **X** to **Y** minutes. If you want to reconnect

at a certain time, pls fill in the same number **X=Y**.

(19) Save All = Save All your setting info for later, it will save the info in the file which name you input in **FILENAME**. If you don't input the name, it will save as a default filename.

(20) Read All = This will load your setting info from the file which name you input in **FILENAME**. If you don't input the name, it will load from a default filename.

2# Off Screen Mining Setting

(There are some problems in TwinCity Mine, It don't work in it now.)

Now, the GAME has changed the Mine function, you cannot get a gem in Twin/Pheonix mines normally. It is more useful in DesertCity mine.

To auto Mine you have 2 options (Both of which drop ore, **but you can set a number in B to pick up the +1 and >+1 ores, Example: Set 2 in B, you will pick up the +2,+3,+4 ores.**):

(1) Dont save gem / Twin Jail

You can make SV so one of three things when you find a gem:

- > Prompt - This will give you a message when you find a gem
- > Off-line - This will disconnect you if you find a gem
- > Mine - This will continue mining if you find a gem

If you are Mining in Twin Jail (you must set as Twin Jail), the Macro should revive you. But if you get pked, It don't revive you.

(2) Save gem

Go to it here PheonixCastle or DesertCity mines with a scroll to that same city and pick a spot to mine.

Make sure you choose what city your in from SV so it knows what to do. Click start and this is what it is supposed to do:

- > Mine till it find a gem
- > Scroll to the city your mining in (if you have a scroll)
- > Sell your ore and buy a scroll
- > Deposit your gem in your bank (provided you don't have a bank password)
- > Hop back to the mine you were just in and continue to mine in the same coordinates as before

If you get pked while mining the Macro should revive you and mining again.

3# Special Functions Setting

-> For Prompt the person or monster, SV will allow you to move and level manually and you can input monster/player names into Monster-name area and SV will notify you when that player/monster is in your area

-> For Follow Team Leader, set this if your in a team and SV will follow your team leader for you
Pls input the name of group leader into Monster-name area(the first field)

-> For Level up manually and prompt refined weapon, SV will notify you when that refined/Unique/Elite/Super weapon is found in your area

-> For Timed clicking

A)The key Shift can lock the attack direction or un-lock it

B)Attack around[Level Up Field]: Pls put the mouse at the root of Wooden stake or the body of Straw man, after the Character cannot move the press key Shift to lock the Coordinates.

FOUR# FAQ

1# How to work on multiple characters at 1 PC?

1. Start Scriptvessel.exe and login successfully.
2. Active game window, move one character and press **F11** or **Ctrl+*** to start the Macro setting interface.
3. Setting the feature and start Macro for this character.
4. For other character, redo 2 & 3.
5. To stop one character's Macro, Pls active the game window, move the character and Press * or **F11**.
6. After you stop all Macros, Click the "Exit" button to exit the platform(ScriptVessel.exe).

2# How to Fix the problem of not moving?

If some of your char don't move anymore when botting, You need only to do 1# or 2# solution.

1# First solution:

Pls change the char's game window size:

if the char's game window is 800*600, pls change to 1024*768. If it is 1024*768, Pls change to 800*600.

2# Second solution:

You can delete all the files in LOG directory in Games folder.

This solution will delete all your game's chars setting. And pls active all your char's SHOW NAME first before botting.

3# How to Autostig?

If you wish to autostig with SV follow these simple instructions:

- 1- Set stig to right click in Conquer
- 2- Click "Level up"
- 3- Click "Taoist"
- 4- Choose "Right click"
- 5- Choose how many seconds between stigs "Click every X Seconds" (X being number of seconds)
- 6- Choose "KS"
- 7- In "Monster-name" type the name of player you wish to stig
- 8- In "Pick Items" choose none
- 9- Set your heal/dissconnect at hp and use mana pot areas to what ever you wish (0 to not disconnect)
- 10- For "Area" put 1 and for "MOV" put 0 (both are 0 is not accept)

4# How to Edit your passwod?

1. Start Scriptvessel.exe (Don't login your SV account. If you have login, Pls Exit the program and restart Scriptvessel.exe).
2. Click Edit Password button, and you will got a message that you must click the button again.
3. Click Edit Password button again to active the new password field(New password must be more than 5 chars).
4. Fill in your SV ID , old password and new password, and click START button.

5. If you get a message "Edit Password successfully!", you have edited your password. Pls use new password to login SV.

5# How to renew your sv account?

1. Send us the payment to our paypal account or Moneybookers account. **Pls note us your sv account in the payment.**
2. After we received the payment, we will renew your sv account and send you the client in 24 hours.
